Training Services

CMA D. ARGOUDELIS & CO S.A. Overview

1

Expert Trainers

Our trainers are industry experts providing cutting-edge knowledge and practical insights for trainees.

2

Tailored Programs

Training programs are customized to meet the specific needs and objectives of each organization.

3

Comprehensive Curriculum

Courses cover a wide range of relevant topics to ensure comprehensive understanding and skill development.

4

Ongoing Support

Post-training support is available to help participants apply their new skills effectively in the workplace.

Training Seminar Highlights

01

Maneuvering System

Focus on practical navigation and ship handling techniques for safety.

02

Boiler System

Hands-on experience with boiler operations and troubleshooting methodologies.

03

Temp & Pressure Controller

Real-world scenarios to manage temperature and pressure controls effectively.

04

Industrial-Marine Hydraulics

In-depth training on industrial-marine hydraulic systems and applications.

05

Advanced Safety in Hydraulic Systems

Emphasis on advanced safety protocols in hydraulic system operations.

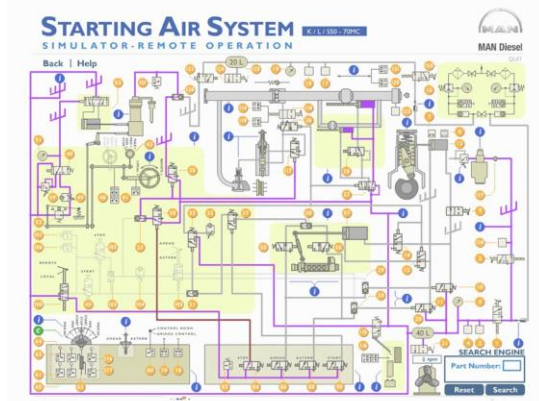

Seminar Analysis

01

Maneuvering System

DESCRIPTION: The maneuvering controls the ship's Main Engine from the Emergency Control, Engine Control Room and Bridge Control. There are different types of Main Engines and drawings of this system for each manufacturer. We will analyze these types, read the drawings and learn how to overcome common failures.

02

Boiler System

DESCRIPTION: Boiler system give us the capability of steam production for several needs in the ship. In this seminar we will go through different types of Boilers, their safety systems, alarms, settings from the external points like transmitters, positioners, valves and pressure switches. We will analyze the problems occurring and troubleshoot them.

03

Temperature & Pressure Controller

DESCRIPTION: In marine automation there are many Controllers in the installed systems. These are controlling pressure, temperature, level, flow, viscosity etc. We can control the systems from distance with the help of a positioner which acts directly to the valve. In this seminar we will learn the most usual types of controllers, how to calibrate them and solve the most common issues that may occur.

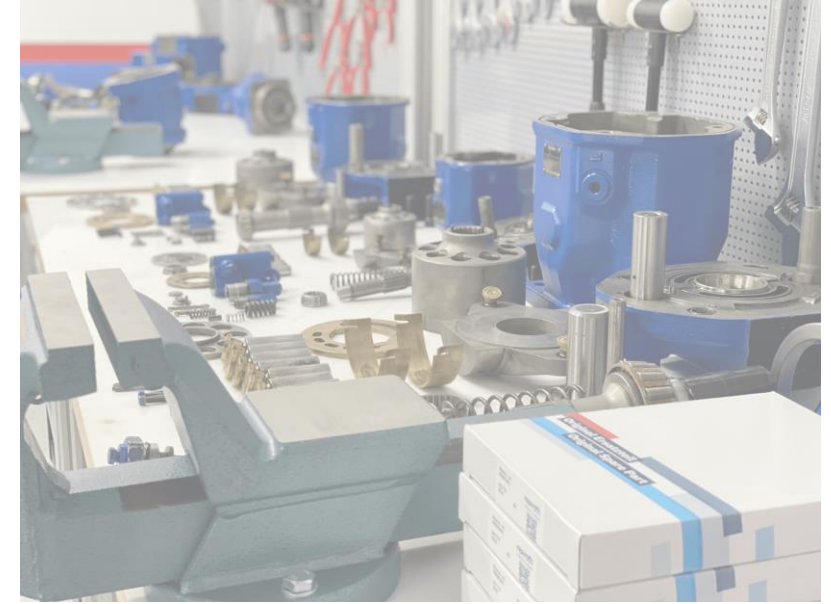

Seminar Analysis

04

Industrial-Marine Hydraulics

DESCRIPTION: Welcome to our Hydraulic Seminars, tailored for professionals in the marine, industry, and energy automation sectors. Join us for an immersive experience where industry experts will delve into the latest advancements, best practices, and cutting-edge technologies shaping hydraulic systems. Our seminars aim to equip participants with in-depth knowledge, practical insights, and hands-on skills essential for success in their respective fields. Whether you're involved in maritime operations, industrial processes, or energy automation, our comprehensive seminars provide a platform for networking, learning, and staying ahead in this dynamic and ever-evolving landscape.

05

Advanced Safety in Hydraulic Systems

DESCRIPTION: Welcome to our cutting-edge Advanced Safety in Hydraulic Systems, tailored for the marine, industry, and energy automation sectors. Our comprehensive solutions prioritize safety without compromising efficiency. With state-of-the-art technology and rigorous testing, we ensure that your hydraulic systems meet the highest safety standards, safeguarding both personnel and equipment. From advanced monitoring and predictive maintenance capabilities to robust fail-safe mechanisms, our systems are engineered to mitigate risks and enhance operational reliability. Trust us to deliver innovative solutions that optimize performance while prioritizing safety in the most demanding environments.

Target Audience for Training Programs

01

Corporate Clients

Companies seeking to enhance employee skills and performance.

02

Industry Professionals

Individuals wishing to advance their careers through specialized training.

03

New Graduates

Recent graduates aiming to gain practical industry experience and knowledge.

04

Management Teams

Leadership groups looking to improve management and strategic capabilities.

05

Small Businesses

Entrepreneurs requiring tailored training solutions to grow their operations.

Training Methodologies and Techniques

Assessment

Evaluate the skills and knowledge of the trainees to tailor programs accordingly.

01

Delivery

Implement the training through various formats such as workshops or online sessions.

03

Design

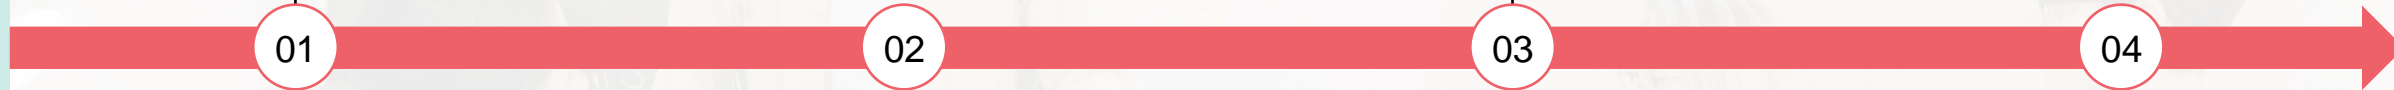

Develop training materials and modules that meet the identified needs and objectives.

02

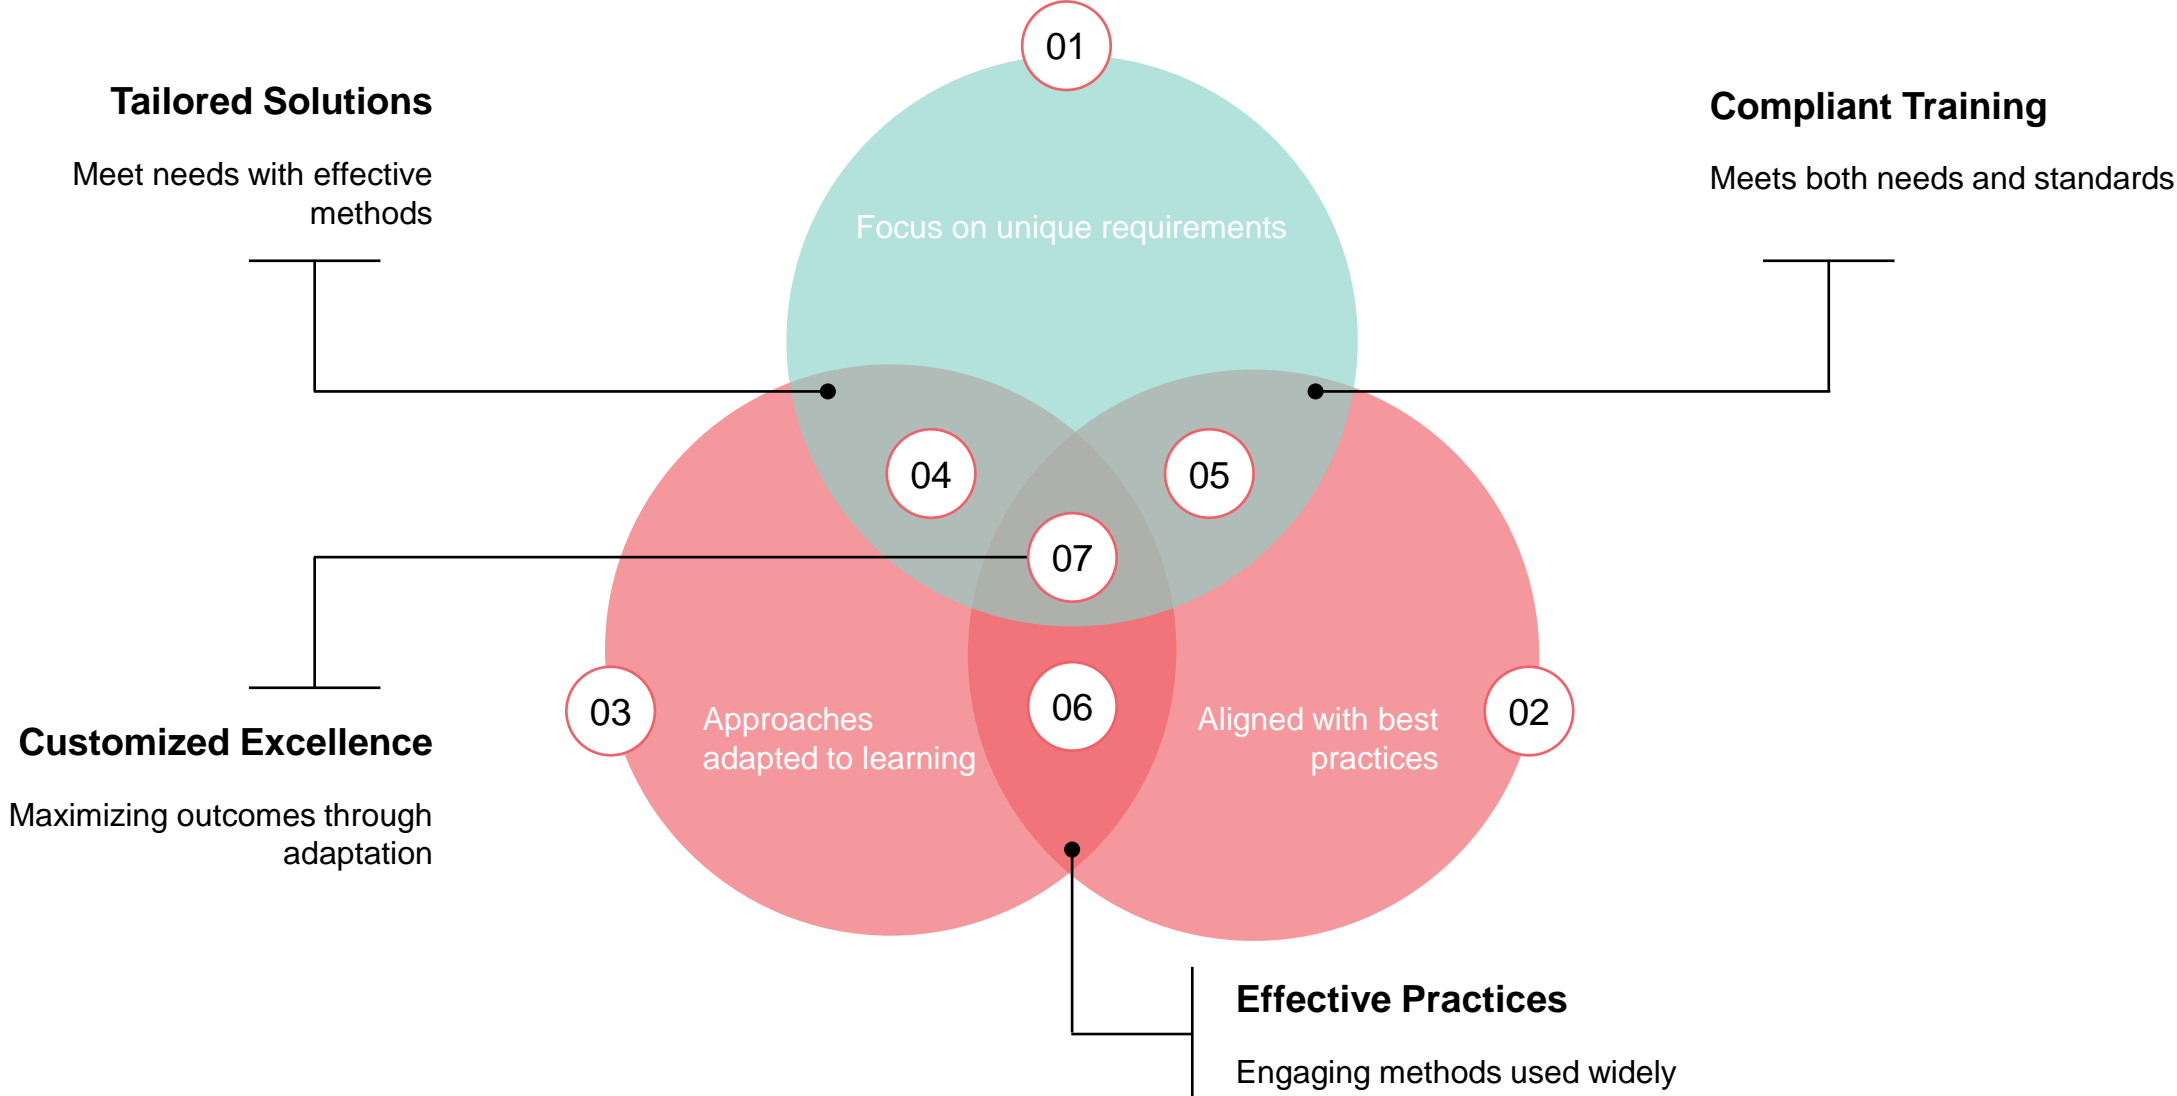

Evaluation

Assess the effectiveness of the training and gather feedback for future improvements.

04

Customization of Training Programs

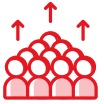

Why Us for Team Training Services

Upskilling of the company's workforce is crucial as it improves employee's job satisfaction and morale by giving them the opportunity to learn new skills.

CMA wants to organize a training session for the company's employees to provide them a platform to improve their skill set to work upon upcoming projects.

Our team of professional trainers can facilitate any customer in improving the skill set of their workforce by imparting world-class training.

Strengths that will add to your company

- Our professional trainers are highly experienced with in-depth knowledge of their subject areas
- We design customized training programs as per the client's needs and requirements
- Our trained candidate has a success rate of 90% in clearing multiple professional certification exams
